

"Wise Owl"

**DECISION
MAKER**

by

Fenton

YES | NO | TAY | GO

Strip off the pressure sensitive tape you like best and apply to the top outside rim of owl base. He's then ready to go to work. Simply spin the head and watch where his beak stops.

Even when the owl is not helping you with decisions he is still quite useful, for he was designed as a container for a roll of stamps, paper clips or change. If you can't decide which to store in him, ask him. He'll help you decide.
